### **View Systems Launches its Latest Product: Mini Sim Cam**

BALTIMORE, February 24, 2010 (PR NEWSWIRE) -- View Systems, Inc. (VSYM.ob) a security and tele-data solutions provider, unveiled its newest product today: the Mini Sim Cam.

MINI, which stands for Mobile Intelligent Network Informer, is a wireless watchdog communication device that checks for intrusion into uninhabited areas like foreclosed houses, storage spaces and vacation homes. It's a portable device that senses motion and sends text messages to a user's cell phone. Property and remote assets may be guarded by this innovative device that requires no plug-in electricity, no physical phone line and no monitoring service. It runs on batteries and one configuration of the system can even send a photo of the intruder to the user's cell phone. Camera settings can be controlled and changed via SMS commands.

View has launched a new website dedicated entirely to this innovative new product: [www.minisimcam.com](http://www.minisimcam.com). The product retails for \$299.99 and can be purchased online by visiting the website.

View Systems CEO, Gunther Than, states, "We've been working on the MINI for many months now and are pleased to finally release it to the public. We've received numerous inquiries from dealers and other interested parties who have already heard about it. There are over a million vacation homes, over twenty million foreclosed houses and millions of storage spaces in the U.S. These are all viable markets that we intend to pursue. I expect this product to enhance our revenues greatly, as have our other cutting-edge security screening devices."

**About View Systems:** View Systems, Inc. manufactures and installs weapons detection identification systems, video management platforms and tele-data communication networks targeted towards correctional facilities, schools, courthouses, government agencies, event and sports venues, and commercial businesses.
