VIEW SYSTEMS DISCLOSES ITS LATEST INNOVATION: THE MINI

BALTIMORE, MD -- (MARKET WIRE) – February 27, 2009 -- View Systems, Inc. (OTC BB: [VSYM.OB](#) - [News](#)), a security and teledata solutions provider, has released information on its latest product, the MINI: Mobile Intelligent Network Informer.

The MINI is a wireless watchdog communication device that checks for intrusion into uninhabited areas like foreclosed houses, storage spaces and vacation homes. It's a portable device that senses motion and sends text messages to a user's cell phone. Property and remote assets may be guarded by this innovative device that requires no plug-in electricity, no physical phone line and no monitoring service. It runs on batteries and one configuration of the system can even send a photo of the intruder to the user's cell phone.

It is expected that the MINI will be a best-seller once it makes its formal debut into the marketplace; it's currently still in the final testing phase. This is one item to watch for.

View Systems CEO, Gunther Than, states, "We've been working on the MINI for many months now and are almost ready to unveil it. We've received numerous inquiries from dealers and other interested parties who have already heard about it. There are over a million vacation homes, over twenty million foreclosed houses and millions of storage spaces in the U.S. These are all viable markets that we intend to pursue. I expect this product to enhance our revenues greatly, as have our other cutting-edge security screening devices."

About View Systems, Inc.:

View Systems, Inc. manufactures and installs weapons detection identification systems, video management platforms and teledata communication networks targeted towards correctional facilities, schools, courthouses, government agencies, event and sports venues, the military and commercial businesses.
